**SCHEMATIC - every wire of the set, grouped by job; read, not to scale**

Cables are joined only at labelled connectors. Legend of the wire-level shorthand: WIRE COLOR (black/stripe), Stephen's built-with-the-harness numbered in its table; grey header = an end on another harness.

**WIRE COLOUR CODES:** BARN RED · WHITE BLK · BROWN BLU · GRASS GRN · ORANGE BLU · ROYAL BLUE · SAINT GRN · WHITE ORN · YELLOW BLU · **EIGHT SLICES (FAT!)** · ■ Blue · ■ Yellow · ■ Orange · ■ Green · ■ = ½ + ½ look with another harness

## THROUGH THE BULKHEAD - every wire that lands on the DRB102 (signals, sensor rails, feeds)

**ECU A - Link G4X plug A (centre duct)**

| | | |
|---|---|---|
| 1 | Injector 3 drive (↓) | wt/vi |
